

SERIE T1-200

Telecontroller™

The Telecontroller Series T1-200 is a control device for remote switching off and on electronic and communication equipment, non-intrusively. It sends alarms of its various sensors and equipment location via GPS.

It is complemented by its monitoring and management system, making it an innovative and functional tool.

Main Utilities:

It allows to remotely controlling the power ON/ OFF of an electronic device:

- ATMs.
- Video Surveillance System.
- Soda and candy vending machines.

Main Functions

- Geo-Satellite Location.
- External Power Cut Alarm.
- Sensor for door opening of external modules.
- Humidity sensor.
- Temperature sensor.
- Contact remote control for switching off and on.

Benefits

- Security
- Remote Access
- Online Tracking
- Event Control
- Event Graphics
- Control of Contacts
- Monitoring Central
- Productivity Improvements
- Online Support Call Center

SPECIFICATIONS - TELECONTROLLER T1-200

MODEL: T1-200

Chassis: Aluminum.

Mounted on a pan (do not place anything on top)

Product Features

- SiRF III GPS and Quad Band GSM 850 / 900/1800/1900 MHZ.
- AGPS (with GSM Base Station ID)
- Monitoring by 3G/GPRS (UTP / UDP) (Protocol NMS)
- Switching On / Off of electrical contacts.
- Internal Battery for monitoring.
- Alarm when power fails.
- Switching on and off report of the electrical contacts. (User, contact, date and time)
- Location monitoring by geolocation.
- Temperature sensor *

Wireless Interface

GPRS
3G

Dimensions

Width: 113 mm.
Length: 150 mm.
Height: 85 mm.

Accessories T1-200

- Telecontroller T1-200
- Antenna GPS
- Antenna GSM
- Cord

Power Supply

- Input power: 120V / 10A. (Current unregulated)
- Internal Battery for monitoring; 850mAh./3.7V

- Operating Temperature: -20 ° C ~ 55 ° C.
- Humidity: 5% ~ 95%
- Monitoring time without power: 10 hours.
- Sensors: Supply Current, Temperature.
- GSM Frequencies: 850/900/1800/1900MHz.
- GPS Sensitivity: -159 dB
- Positioning accuracy: 10 Meters.
